# Our products

... a true ASSET for everyday kitchen use

## Frozen foods, freshness in stock

Frozen foods are an ideal solution for everyday kitchen use. Many professional chefs rely on convenience and prefer high-quality, ready-to-cook or ready-to-eat frozen products. There are many cases arguing in favour of frozen foods:

### Quality

Strict quality controls and standardised production processes ensure a uniform high quality; hygienic protection against microorganisms is ensured through freezing at at least -18°C (HACCP).

### Availability

Due to the freezing process the products have a long shelf life (between 6 and 12 months), making them available to chefs for their creative cuisines throughout the whole year.

### Portionability and cost-efficiency

Thanks to the modern IQF method, each individual piece is frozen separately, enabling

better portioning. Chefs can process the quantities they need – an absolute price advantage thanks to simple and exact portioning.

Frozen meat products offer a wide range of benefits in professional kitchens. They meet the highest hygienic requirements, simplify general handling, reduce costs and save you valuable time in your kitchen. With our Foodworks products, our customers can rely on tested quality and a range that is guaranteed to meet their needs.

# Beef, unseasoned | raw

... for individualists

## Full meat flavour for custom seasoning

We give you the patty, you do the rest, no matter where the culinary journey leads. Our unseasoned burgers are clean label products, because they are made of pure beef. As products of nature made of pure beef, our unseasoned burgers are clean label products. In addition, the beef originates from and is processed exclusively within the EU and UK.

### Angus Burger

### Info

### Angus

Originating from the Angus region of north-east Scotland, this meat stemming from one of the most robust hornless cattle forms the foundation for our Angus Burger.

Mild island climate of Great Britain and Ireland allows for this cattle breed to be pasture-fed virtually all year round (Irish CAB – Certified Angus Beef). Gentle rearing and lush, fresh grass as well as the absence of all feed additives give their meat a flavour beyond comparison. Our end-to-end quality controls ensure extraordinary product quality.

## Info

### Seasoned vs unseasoned

It's up to you ... Whether seasoned patties or custom spice mixes or marinades for individual recipes – our assortment offers a tailored solution for all your needs.

The advantage of seasoned products is clear: You can prepare the products and serve them to your guests without further preparation, saving you resources and time.

The advantage of unseasoned products: You get to choose what flavour to give your product. We supply first-class raw products you can lend a personal touch to with your own seasoning mix.

## Tip

### A World of Food Solutions

Need something faster and even more convenient? With the "Big Burger" range for the retail trade, the OSI group can also fulfill this wish. Ready to eat burgers with sauce are put into the microwave together with the package and after 90 seconds they are ready to serve!

## Info

## Food safety is paramount

The Global Food Safety Initiative (GFSI) publishes standards designed to promote and secure sustainable food safety for consumers worldwide.

The GFSI standards are based on the ideal of continuous improvement, and seek to integrate standards throughout the global supply chain. They are recognised by the food industry all over the world. The food safety schemes IFS, BRCGS and FSSC 22000 have all implemented the GFSI benchmarking process and have received GFSI certification.

All of the manufacturing facilities of the OSI Group are GFSI-certified as well. In this way, OSI has achieved its goal of constant improvement and compliance with the latest food safety requirements.
